Summary

Computer Science Engineering graduate with hands-on experience in software development, backend systems, and full-stack applications. Proficient in Java, Python, JavaScript, React, Flask, SQL, REST APIs, and Git, with strong foundations in DSA, OOP, DBMS, Operating Systems, and Computer Networks. Achieved Global Rank 249 in TCS CodeVita Round 2.

Technical Skills

Programming: Java, Python, JavaScript

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Web Development: HTML, CSS, React.js, Node.js

Backend: Flask, REST APIs, API Integration, Backend Development

Databases: SQL, MySQL

Software Tools: Git, GitHub

AI/ML: TensorFlow, Keras, Scikit-learn, Pandas, NumPy

Experience

AI Intern – IBM

Jul 2025 – Aug 2025

- Developed a book recommendation chatbot using IBM Watson Assistant with intents, conversation flows, and context handling.
- Tested and refined chatbot workflows for multiple user interaction scenarios.

ML/Web Development Intern – DCM Shriram Ltd.

Jul 2025 – Aug 2025

- Developed a GPS-based web application for agricultural plot mapping and distance calculation using geolocation and mapping APIs.
- Integrated a CNN-based crop disease detection model with application components and backend prediction workflows.

Machine Learning Intern – SetuBazaar

May 2023 – Nov 2023

- Developed recommendation and segmentation models and integrated model functionality with a Flask backend.
- Performed data preprocessing, feature engineering, model evaluation, and application integration using Git and Agile practices.

Projects

UrbanMove – Real-Time Public Transport Tracking

- Developed a real-time transport platform with user and driver applications for live bus tracking, ETA prediction, fare calculation, and seat availability.
- Built frontend and backend components using React and Flask, with Firebase for real-time location and trip data.
- Implemented workflows for location updates, trip data processing, API integration, and real-time user updates; evaluated LSTM and Transformer models for ETA prediction.

AI Groundwater Level Predictor

- Developed a prediction application using Multiple Linear Regression to estimate groundwater levels from environmental and hydrological data.
- Implemented preprocessing, feature selection, model training, evaluation, and application-level prediction workflow.

AI Crop Disease Detection

- Developed a CNN-based image classification application using TensorFlow/Keras for crop disease detection.
- Integrated model predictions with a backend workflow to provide disease information and treatment suggestions.

Achievements

TCS CodeVita 2026: Global Rank 249 in Round 2; Global Rank 1497 in Round 1.

TCS HackQuest Season 10: Qualified all competition rounds in a cybersecurity-focused technical competition.

Education

B.Tech. in Computer Science & Engineering

2022 – 2026

Rajkiya Engineering College, Mainpuri (AKTU)

CGPA: 7.5/10

Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, AI, Machine Learning
